■ **Features:**

- ✦ Clean Application
- ✦ No Mess
- ✦ Quick and Ready to use
- ✦ Splint will be ready in no time

Instructions for use:

1. Select appropriate size (width) & no. of layers required.
2. Cut required length from the roll or select pre cut size.
3. Mark on the splint where the cuts are required.
4. Quickly pass through the room temperature water and squeeze the splint gently by rolling it keeping the foam out side. Splint may be wrapped in clean towel to remove excess water.
5. If you squeeze more, the setting time of the splint will be shorter and if you squeeze less then the setting time will be longer.
6. Cut the marked area now.
7. Place the splint on the flat surface and remove wrinkles.
8. Rub finger on the open edges of the splint so that it does not hurt the patient.
9. Apply the splint now on the patient and wrap with gauze or elastic bandage.
10. Try to mould the splint as per body contours. Do not put excessive pressure to mould the splint.
